

## Contrast Reaction Training

Contrast Reaction Training is a web-based, fully interactive training program using video case scenarios to teach the proper management of adverse patient reactions to contrast media.

### Important Note and Technical Requirements for the Contrast Reaction Training:

The current version of the Work is Supported for Explorer, Google Chrome or other browsers. **All users must have the latest version of Google Chrome, Firefox, Safari, or Explorer.** The program works on all desktops, tablets and smart phones. However, the small screen size of most phones may make the experience sub-optimal.

### International Requests:

University of Washington agreements require additional review if the requesting entity is located in, or affiliated with the government of, China (Including Hong Kong; not including Taiwan), Iran, North Korea, Russia, or Syria. For requests from these countries, please **allow for an additional month of processing time** for a response.
