CTC PLUS

CTC PLUS is a web-based platform for implementing the Communities That Care prevention system developed by the Social Development Research Group, UW School of Social Work. Communities That Care helps local coalitions develop community-specific prevention plans based on their unique levels of behavioral health problems and risk and protective factors through a 5-phase process. CTC PLUS provides a step-by-step guide and tools for building high-functioning prevention coalitions. Coalitions participate in a series of web workshops where all members learn and apply prevention science principles to guide assessment, decision-making, and program implementation. CTC PLUS includes a web-based curriculum and community resource tools accessed via the CTC PLUS website.
