

# Prosthetic Limb Users Survey of Mobility (PLUS-M<sup>™</sup>)

The Prosthetic Limb Users Survey of Mobility (PLUS-M<sup>™</sup>) is a bank of calibrated questions for measuring mobility of adults with lower limb amputation. The PLUS-M<sup>™</sup> item bank has been rigorously developed using modern psychometric methodology and is intended for use in clinical practice and research. PLUS-M<sup>™</sup> instruments (i.e., computer adaptive test and short forms) are based on the PLUS-M<sup>™</sup> item bank. Information about PLUS-M<sup>™</sup> can be found on our website at https://plus-m.org.

# **International Requests:**

University of Washington agreements require additional review if the requesting entity is located in, or affiliated with the government of, China (Including Hong Kong; not including Taiwan), Iran, North Korea, Russia, or Syria. For requests from these countries, please **allow for an additional month of processing time**for a response.

## **Available Licenses**

PLUS-M<sup>™</sup> instruments may be used without a license agreement when they are used solely for research, patient care, or educational activities. Users must obtain a paid license agreement when integrating PLUS-M<sup>™</sup> instruments into commercial technology products, including electronic medical record software, mobile applications, or access-limited instrument repositories. For questions about whether a license agreement is required, please contact the developers at info@plus-m.org

## **Technology Product License**

To license this product, please select the desired option(s) to the right. A basic technology product license allows for in-product administration of PLUS-M<sup>™</sup> 7- and 12-item short forms and/or administration of the PLUS-M<sup>™</sup> item bank via computerized adaptive test. Note that administration software is not included with this license. Licensees may request in-product administration of PLUS-M<sup>™</sup> custom short forms for an additional fee.
